When creating your retirement strategy, you can take one of two approaches:

1. Select a target-date fund

Target-date funds allow you to delegate asset allocation and rebalancing decisions. You can choose the target-date fund that most closely matches the year you plan to retire. For example, should you choose to retire at age 67 in 2044, you might consider the Target-date 2045 Fund.¹

2. Build your own retirement portfolio

The plans offer a range of investment options from which to choose. Learn more about your investment choices online at TIAA.org/tulane.
